Opportunity for Bachelor/ Masterthesis in Behavioral Biology at the Medical University of Vienna

The Pollak Laboratory of Behavioral Biology at the Department for Neurophysiology and Pharmacology of the Medical University of Vienna is - with immediate effect - searching for a Bachelor or Master student interested in behavioral biology. The topic offered concerns the video analysis of mouse behavior in an animal welfare related project, dealing with the influence of stereotypic behaviors on the brain and behavioral performance of mice in standardized behavioral tests.

Interested and motivated candidates please contact us:
